Fresh Watercraft is a PWC performance company, located minutes from the US/Canada border. We specialize in classic and vintage 2 stroke Kawasaki Jet Skis and Yamaha Superjet watercraft, but also have a large variety of other sit-down and 2/3 seater parts on hand. We have a facility in both Chilliwack, British Columbia, as well as Sumas, Washington. We currently have dealers and customers in 72 countries, and always do all the necessary North American cross-border imports/exports ourselves, so we can ship from within Canada to destinations inside Canada, just like we ship from within the U.S. to American destinations as well. International shipments typically ship from the US. We are also in partnership with, and exclusively distribute a line of high performance aftermarket parts for personal watercraft under the name Jet Race Engineering. JRE uses only the highest quality materials such as 6061 aluminum and marine grade stainless steel in the construction of their components. They are very proud of their precision work, and the quality shows in the products. We have received rave reviews from within the personal watercraft industry on the high-end aspect of JRE products.

As for used parts, we always have thousands of used stock and aftermarket watercraft parts available, so please don't hesitate to ask if you have some unique or difficult to find component needs. We are also a dealer for Skat-Trak, Blowsion, SBT, Hydro-Turf, as well as several other PWC performance companies, so we can source pretty much anything new/aftermarket you might be interested in as well. Many thanks for your interest in doing business Fresh Watercraft and Jet Race Engineering.
